What went well

- Project is on schedule, assigned tasks were completed punctually.
- No issue encountered. Meetings were efficient and communication was clear.
- Google Drive and GitHub's folders were soundly structured. Version control is in place.

What went wrong

- Difficulties in estimating time requirements for tasks.
- Documentation occupied a significant amount of time.

What were the problems and their causes

- Lack of experience in planning, and insufficient knowledge of the current software development process.
- High workload from other courses, jobs, and personal circumstances.

What can be done in the next sprint to improve the project

- Familiarize ourselves with the development process.
- Improve planning by setting more reasonable expectations for tasks.

What lessons could we learn

- Scheduling and time management are crucial.
- Teamwork and communication are essential.
